

CROSS-CUTTM FOAM PADS

Lake Country Mfg., Inc.

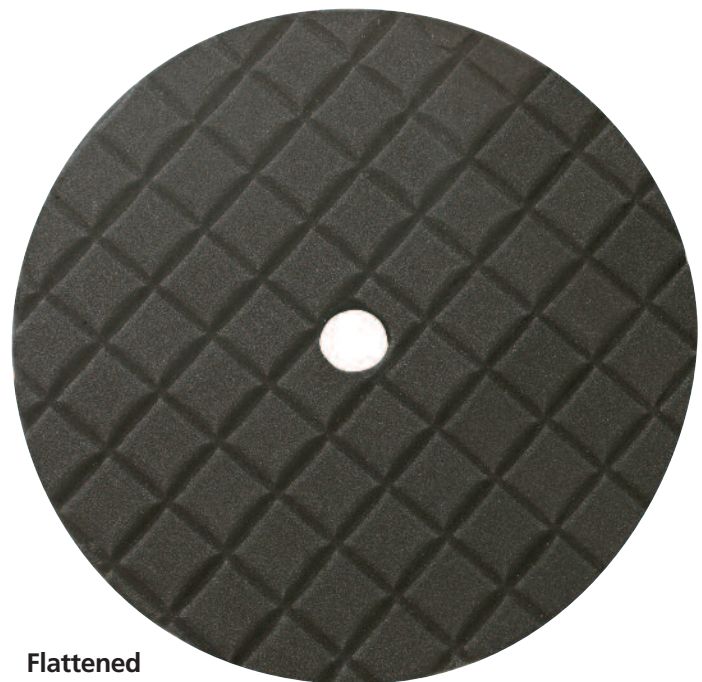

Cross-Cut Design Doesn't Completely Flatten During Use

- **Improved Operator Control** ... Engineered design allows pad to glide over surfaces by reducing pad skipping on the buffing surface.
- **Runs Cooler** ... Designed channels allow the pad to run cooler on the surface.
- **Minimizing Splatter** ... Cross-Cut nubs hold the polish on the pad surface longer, reducing clean up and product waste.

Normal

Flattened
