WAFFLE PRO PADS

Convoluted Foam Technology

Introducing convoluted foam technology in three proven "professional" foam formulations.

The waffle profile is designed to:

- Reduce heat build-up while buffing
- Allows pad to glide over surface while polishing
- Prevents skipping of pad on surface

White 8" x 7/8" Compounding Waffle Foam Pads (2/bag) - An aggressive compounding foam used for removing sanding scratches, deep scratches, oxidation and weathered paint.

Black 8" x 7/8" Finishing Waffle Foam Pads (2/bag) - Used with a finishing polish to remove light swirl marks.

Blue 8" x 7/8" Finishing Waffle Foam Pads (2/bag) - Very soft foam used with a final polish, glaze, or wax to create exceptional shine.
