

Below are the revised requirements for private labeling.

Private Label Bag

There is no additional charge to private label our standard bags. The bag printer does not have the capability to print high resolution artwork. Below is the list of high to low quality image formats for the bag printer. Also, for a better result, please have the artwork in pure black and white (no grey scale or color)

1. TIFF (.tiff)
2. Bitmap (.bmp)
3. JPEG (.jpeg)

Private Label on Pad

Private label orders involve the creation of digital artwork. There is a onetime set-up fee with the initial private label order. Please contact customer service for pricing. There is no charge for current customers to convert their current artwork to the new printer.

Due to the printer's improved setup and clean up time, we have reduced the minimum order requirements.

1. Initial order = 72 pieces
2. Any additional order = 72 pieces

The printer requires higher resolution artwork for it to print properly. The highest quality image is going to result in the best image on the Velcro or Canvas. Listed below from highest quality image to least quality image. The first 2 options will give the best result.

1. Adobe Illustrator (.ai)
2. Editable (.eps)
3. TIFF (.tiff)
4. Bitmap (.bmp)
5. JPEG (.jpeg)

If you wish to have printing on both the bag and the pads, we will need both types of images.

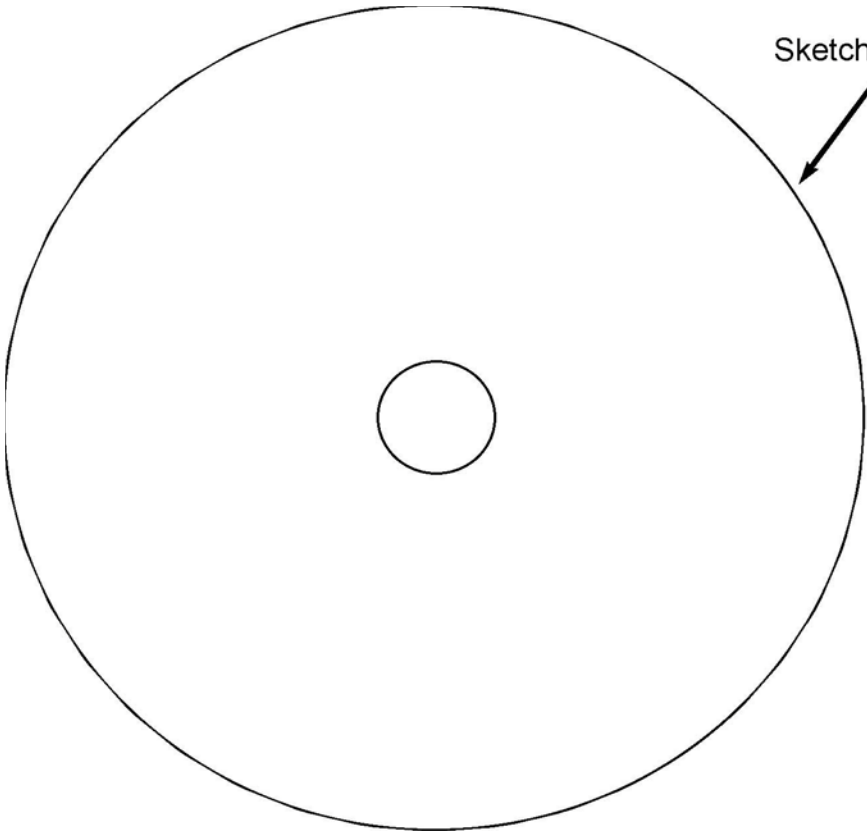

The new printer gives us the capability to print in 4-color on white loop for a small up charge. Please contact customer service for pricing information
