

# FORCE PADS

Lake Country Mfg., Inc.

## Featuring HYBRID Foam Technology

### Improved Design to Our HYBRID Foams With a New Cutting Pad

- Hybrid foams are specifically engineered with small cells and dense construction to keep abrasives in the chemicals close to the surface of the pad. This results in faster correction time as more polish stays on the working surface rather than being absorbed into the foam.
- Engineered for forced rotation and Rotary Machines
- Tapered design and 1-1/4" (32mm) thickness provide a user experience unlike other pads on the market
- FORCE™ pads use the same HYBRID foam technology and now combine a ventilated center hole for cooling and centering
- Additional sizes available to the line that will fit a variety of backing plates
  - 3-1/2" x 1-1/4" with 3" loop (No Center Hole)  
Made to fit 3" backing plate
  - 5-1/2" x 1-1/4" with 5" loop (with Center Hole)  
Made to fit 4-3/8" or 5" backing plate
  - 6-1/2" x 1-1/4" with 6" loop (with Center Hole)  
Made to fit 5-1/2" and 6" backing plates

# FORCE PADS

## Featuring HYBRID Foam Technology

- **NEW HYBRID Grey Foam** ... Is a heavy cutting pad that is firm and resists collapsing with heat. These pads work great for heavy defect removal and spot repair, but also work great for polishing on very hard clear coats. This pad is highly recommended in areas with high heat and/or humidity, can also be "broken in" by soaking in warm water and spinning dry.

Size Part #

3-1/2"	FR-HGrey 3.5"
5-1/2"	FR-HGrey 5.5"
6-1/2"	FR-HGrey 6.5"

- **HYBRID Orange Pad** ... has been a favorite for years. This pad works great for cutting in colder climates, but can be used as a light cutting pad in warmer temperatures. This foam softens with heat throughout the polishing cycle to give a good bite in cutting ability but still finishes well.

Size Part #

3-1/2"	FR-HOrange 3.5"
5-1/2"	FR-HOrange 5.5"
6-1/2"	FR-HOrange 6.5"

- **HYBRID White Foam** ... is a staple for polishing and leaves a perfect finish on many paints. The partially closed cell construction helps "smash" or "sandwich" the abrasive to the surface to maximize the result.

Size Part #

3-1/2"	FR-HWhite 3.5"
5-1/2"	FR-HWhite 5.5"
6-1/2"	FR-HWhite 6.5"

- **HYBRID Black Foam** ... is the perfect solution for any finish work, even on the softest, most finicky paints. The silky feel combined with the slightly more dense body create a perfect combo for finishing.

Size Part #

3-1/2"	FR-HBlack 3.5"
5-1/2"	FR-HBlack 5.5"
6-1/2"	FR-HBlack 6.5"

- **HYBRID Red Foam** ... is softer than the HYBRID Black but has a slightly larger cell structure for better residue control when using cleaner wax or All-in-One (AIO) polish applications.

Size Part #

3-1/2"	FR-HRed 3.5"
5-1/2"	FR-HRed 5.5"
6-1/2"	FR-HRed 6.5"
